

LAB NO. : 5 DATE : 12-Aug-2011
PATIENT NAME : MR. KETAN CHAVAN SEX : Male
REF. BY DR. : DR. PATIL M.B.B.S. AGE : 29 Years
SAMPLE COLL. AT : CRYSTAL LAB

SLIDE TEST FOR ANTI - STREPTOLYSIN O

Result Negative
Titre 1:40
Method Latex Agglitunation
Kit Used RHELAX - ASO TULIP
Control Used Positive & Negative

Comments : Rhelax ASO slide test for detection of antibodies to streptolysin O is based on the principle of agglutination. The test specimen (serum) is mixed with Rhelax ASO latex reagent and allowed to react. If antibodies to streptolysin O are present in concentrations more than 200 IU/ml but less than 400 IU/ml then a visible agglutination is observed. If antibodies to streptolysin O are not present or are in concentration less than 200 IU/ml then no agglutination will be observed. Agglutination is a positive test result and indicates the presence of detectable levels of Anti-streptolysin O in the test specimen. No agglutination is a negative test result and indicates the absence of detectable levels of Anti-streptolysin O in the test specimen.
